

European Parliament Elections 2019

Europe needs to celebrate its demographic reality in a fair and sustainable way to fulfil the aims of the Charter of Fundamental Rights for recognition and respect for the rights of older persons. To achieve this, the European Union must reflect the needs of all its citizens and work towards actions that will embody our common core values of non-discrimination, equality and solidarity.

Make your pledge today to:

1. Enhance older persons' rights through **combating ageism and age discrimination**
2. Ensure a life-course perspective on work and create **inclusive labour markets**
3. Ensure **adequate pension and old-age income** for both women and men
4. Protect the **right to live and age in dignity** through adequate person-centred health and long-term care accessible to all, including equitable access to palliative and end-of-life care
5. Ensure **healthy lives** and promote well-being for all ages
6. Enable **universal access to goods and services** in today's digitalised society including for older persons
7. Empower older citizens to **fully participate** in the social and democratic life
8. Enable older people **to stay in control of their own decisions** and support them in life challenges such as bereavement, loss and social isolation
