

# Improve your balance

## Get Ready

This is something you can do at home after breakfast. Wear some loose clothes and have a chair handy to support yourself until you're confident. Start by either shaking out or rubbing your joints or do the stretching activities on Factsheet 1.

### 1. Posture Perfect

Start with your feet slightly apart, toes facing forward, knees soft (slightly bent). Raise your shoulders, roll them back and drop them down - arms by your side.

### 2. East / West Shift

Lift your right leg and turn your hip so that your right foot points out to the right (East). Step out to East (bending your knee as you take the weight). Push back again so that you are standing with your feet almost together. Repeat 5 times and then repeat to the left (West) with your left foot.

### 3. North / South Shift

Take a long step forward with either foot. Make sure your toes are out further than your knee. Slowly shift your body forward (North) onto the foot in front, (bending your knee slightly to take the weight) until there is no weight on your back foot. Slowly move your weight backwards (South) onto your back foot, (bending the knee slightly to take the weight) until there is no weight on the front foot. Repeat 5 times and then repeat with the other foot in front.

Improve your balance more older people more active, more often

The National Programme for Sport and Physical Activity for Older People
